IDEA, Integrated Development Association was formed in 1990 as a non-profit organisation. With its mission of sustainable development and empowerment of people it promotes SETs, household energy, and environmental issues. Its primary target group is local NGOs involved in community based activities that can integrate this in their work.

The main achievement is the establishment of a commercial network of stove producers and distributors. At present the network produces and distributes over 300,000 stoves annually. It is also working with micro-hydro, briquettes from sawdust and rice-husk and a journal on renewable energy and sustainable development.

IDEA is headed by a multi-disciplinary board with 6 non-related persons.
